The municipal election to come off in May has brought out many tickets and much talk, but the salom men seem to the the most interested. AN UP-TO-DATE FIRM.

AN UP-TO-DATE FIRM.

In noting the advancement of some of Richmend's most enterprising firms, it is with pleasure that we call to attention at this time the advancement and prosperous way the Tragle Drug Company, No. 817 East Broad Street, has pushed ahead in not quite six years in this city. From a small adventure and enterprise here, it has steadily grown until to-day it occupies a position of prominence in the first ranks of the Drug Houses of the South. Its conceniel proprietor, Mr. T. Elwood Tragle's, untiring efforts and adaptibility in meeting the demands of the public are responsible for the many new additions he has added to his store from time to time—first installing a. Rubber Goods Department, later a Trues Department, with all the necessary equipment, with attendants, etc., and more recently one of the most complete, in every detail, prescription counters in this city. Appreciatins that the completeness of such a department would be practically worthless without the superintendency of the best medical expert, he has placed at the head of this department a druggist, by no means a stranger to the Richmond people—Mr. J. L. Ridenour—who for twenty years has been connected with the drug business of this city, being for a number of years with one of its oldest druggists, Dr. W. H. Scott, and Owens and Minor, and for a number of years in business for himself at the gorner of Bighteenth and Main Streets, and whose experience and ability needs no questioning, is surely evidence enough that the department is in the one of its oldest driggists. M. The cott, and Owens and Minor, and for a unifier of years in business for himself the corner of Eighteenth and Main treets, and whose experience and ability seeds no questioning, is surely evidence nough that this department is in the cost competent hands. Mr. Ridenour will ge giad to have his friends coul on him ere, where the most courteous and trompt attention will be given to all uniform the activation will be given to all uniform the contract of the efficiency of this deartment it would be doing it an injustice op ass without also speaking of the reaction and here, as spoken of the efficiency of the fine of traffic handled by the railroads in their histories. Vice-President Finley, of the Southern, who is in the Mediterranean, is not expected to return until May. Overwork has imposed a long rest.

Wr. Charles F. Stewart has been appointed against general passenger agent of the Seaboard Air Line, Railway system, where a simple glance will impress ou with the strict business methods and he up-to-date way to has obstransacting at the gorner of Eighteenin and admits fireets, and whose experience and ability needs no questioning, is surely evidence enough that this department is in the most competent hands. Mr. Ridenour will be glad to have his friends call on him here, where the most courteous and prompt attention will be given to all business under his personal charge. Having spoken of the efficiency of this department it would be doing it an injustice to pass without also speaking of the reasonable charges made herein. Simply a reasonable profit is charged, and all medicinal articles have a reduction made. An associated line of Toilet Articles, Rubber Goods, Trusses, and a complete line of proprietary medicines can be found there, also, at a remarkably reasonable prically would advise a visit to Mr. Tragic's Store, where a simple glance will impress you with the atrict business methods and the up-to-date way to has of-transacting

Crawford should not apologize to him for a certain publication, which was the basis of said chiarge of contempt.

S. That the said C. J. Campbell, on or about the 80th day of June, 1802, when expecting to be indicted for an assault committed by him with a cowhide on one C. H. These resolutions were agreed to in the Senate with an amendment, inserting the word "alleged" before "causes," and the amendment was later agreed to by the House and Judge Campbell given the constitutional notice of twenty days and furnished with a copy of the resolution and "alleged" causes, all of which were entered of record on the journals of the two houses. When the house came on April 9th to finally vote on the question of removal, a simple resolution to that ond, unaccompanied by any "causes," was adopted, and it is that which is now pending before the Senate Committee,
But a strong House leader, who was a member of the Legislature which removed Judge Shumate, of Fauquier, and who is familiar with the procedure in the Stevens case, contends that the House in the present instance has followed the precedents in both the others, and that its action is clearly within proper constitutional lines.

The meeting of the Senate Committee set for next Thursday will be looked forward to with great interest, as no case before any Legislature in recent years has attracted half so much attention.

Hon Richard B.
